QUALITY OF CERAMICS

Due to the inherent properties of ceramic ware produced by foreign manufacturers, there may be small imperfections or irregularities which should not be perceived as defective. Variations in materials, firing temperatures and colour pigments may result in variations in glaze and imprint colours. These variations must be considered acceptable.

Please Note: Objects at the top of your artwork will have a different curve than objects near the bottom.
Due to the nature of these mugs - circular images may become slightly oval when the art is curved when printing.
There will also be white space between the top of the artwork and the lip of the mug. Bleeding off the top is not possible.
